Faculty of Science and Technology (FST)

Department of Computer Science (CS)

Course Faculty: Nazia Alfaz

Introduction to Programming Lab Exercise (Lecture 2 & 3)

1. Write a C++ program for each of the following patterns.

* *	5 5 10 5 10 15 5 10 15 20 5 10 15 20 25 5 10 15 20 25 30
--	---

2. Write a C++ program that takes 5 integer values as inputs from the user using for loop and prints the average of five inputs.
3. Write a C++ program that takes a number from the user and prints first inputted number of Fibonacci numbers from Fibonacci series.

Sample: Inputted number: 09

First 9 Fibonacci numbers are: 0 1 1 2 3 5 8 13 21
